Summary

Full-stack developer with hands-on experience in building scalable web applications using React.js and Node.js. Proficient in developing RESTful APIs, optimizing database performance, and implementing secure authentication. Passionate about creating intuitive user interfaces and efficient back-end solutions. Skilled in JavaScript, Express.js, MongoDB, and cloud technologies. Interested in problem solving and collaboration within dynamic development teams.

Experience

Software Developer — *Thiruvananthapuram, Kerala*
My Famto — *Jun 2024 – Present*

- Designed and developed a scalable database architecture and built RESTful APIs from scratch, ensuring efficient data handling.
- Built a React Native mobile app from the ground up, learning the framework while working on the project.
- Developed an interactive Admin dashboard using TanStack Query for efficient data caching.
- Optimized MongoDB queries, improving database performance and reducing query response time by 11%.
- Enhanced app performance by implementing WebP images and JS minification, improving load speed.
- Reduced bugs and improved stability through rigorous testing and debugging.

Fullstack Developer Intern — *Thiruvananthapuram, Kerala*
Mashupstack — *Dec 2023 – Apr 2024*

- Developed full-stack web applications using React.js for frontend and Node.js with Express.js for backend.
- Created RESTful APIs and optimized database queries in MongoDB for improved performance.
- Implemented JWT authentication for secure user logins and API access.
- Applied Redux for state management, ensuring smooth application performance.
- Collaborated with senior developers to apply best coding practices in React.js and Node.js development.

Rats Technologies

Projects

Rapido ride booking App - Clone — *Github*

- Merged captain and customer functionalities into a single mobile app, simplifying user interactions.
- Integrated Google Maps services for real-time ride tracking and navigation.
- Implemented secure authentication for both captains and customers, ensuring role-based access control.
- Developed WebSocket connectivity for real-time ride updates and seamless communication.
- Designed a responsive and intuitive UI, enhancing the overall user experience.
- Tech Stack: React Native, Node.js, Google Maps API, WebSockets, MongoDB.

Movie Booking Web-app *Github*

- Provided users with a wide variety of movies, detailed information, and user-friendly browsing using React and Bootstrap.
- Integrated secure authentication with Express and Razorpay for transactions.
- Enabled users to manage bookings, view history, and receive real-time updates. Used MongoDB for data storage.
- Tech Stack: React, Bootstrap, Express, MongoDB, Razorpay.

Food Recipe Web-app *Github*

- Built a React.js frontend with Tailwind CSS, ensuring a modern and responsive UI.
- Implemented user authentication using JWT for secure recipe posting and interaction.
- Used Express Validator to maintain data integrity for user-submitted recipes.

Education

Bangalore North University *2020 – 2023*
Bachelor's of Computer Application

Kerala State Board *2020*
Higher Secondary

Kerala State Board *2018*
High School

Technologies

Frontend: HTML, CSS, Bootstrap, Tailwind CSS, React, React native

Backend: Javascript, Node, Express, Typescript

Database: MongoDB, MySQL, Firebase

DevOps: Git, Docker, AWS

Tools: Postman, Thunder Client, REST API, Figma, NPM
